THOMSON'S - SABIE pays top dollar for recyclable material including glass, plastic types, tins, sub grade metal, paper etc. This facility includes a modern weighbridge as well as baling and other equipment to process waste products. We do have a collection service in place and collect daily both locally and from outlying areas. Areas covered by our collection service includes: Graskop, Lydenburg, Pilgrims Rest, Burgersfort, Ohrigstad, Hazyview, Busbuckridge etc. 90% Plus of all material processed by this plant, is bought from disadvantaged entrepreneurs benefiting communities with job creation ect. In the end this division makes the greenest province even greener!!!
